RAYAPATI RISHITHA

+91 9121624512 | rishitharayapati40@gmail.com | Portfolio | GitHub | LinkedIn

Professional Summary

Computer Science Engineering student with a strong foundation in Java, SQL, Data Structures and Algorithms, and software development. Skilled in problem-solving, debugging, database management, and developing practical software solutions through academic and personal projects. Demonstrates analytical thinking, adaptability, and a strong commitment to continuous learning. Eager to contribute technical expertise, collaborate with cross-functional teams, and deliver efficient, reliable solutions as an Associate Engineer in a technology-driven environment.

Education

QIS College of Engineering and Technology, Ongole, Andhra Pradesh **2023 – 2027**
Bachelor of Technology in Computer Science *CGPA: 8.5*

Sri Chaitanya Jr College, Ongole, Andhra Pradesh **2021 – 2023**
MPC *94.2%*

Sri Sai High School, Ongole, Andhra Pradesh **2020 – 2021**
SSC *99.7%*

Technical Skills

Programming Languages: Core Java, JavaScript, C
Frontend Technologies: HTML, CSS, React.js
Backend Technologies: Java, REST APIs
Databases: MySQL
Developer Tools: Git, GitHub, VS Code, Supabase, Postman
Automation & Workflow Tools: n8n
Core Computer Science: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Soft Skills: Communication, Problem Solving, Team Collaboration, Leadership

Projects

TrustPay – Client-Worker Escrow Platform

React.js, Node.js, Express.js, PostgreSQL, Prisma, Supabase, Socket.IO, JWT

- Developed a full-stack escrow platform enabling client-worker collaboration through service requests, digital contracts, e-signatures, milestones, and transaction management using React.js, Node.js, Express.js, and PostgreSQL.
- Implemented JWT authentication and Role-Based Access Control (RBAC) for Client, Worker, and Admin workflows, enforcing role-specific authorization across REST APIs.
- Engineered real-time communication using Socket.IO for collaboration requests, chat messaging, contract updates, notifications, and transaction events.
- Designed wallet and escrow workflows for milestone-based funding, secure fund release, transaction history, invoice generation, and completion certificates with persistent database management.

DSA RankBoard – College Competitive Programming Platform

React.js, Node.js, Express.js, Supabase, Clerk, REST APIs, Web Scraping

- Developed a college-level DSA leaderboard aggregating coding statistics from LeetCode, GeeksforGeeks, HackerRank, Codeforces, and CodeChef.
- Implemented a weighted scoring and ranking engine to evaluate student performance and dynamically update leaderboard positions based on coding statistics.
- Built separate Student and Admin portals with Clerk authentication, student management, bulk Excel import, profile auditing, platform synchronization, and real-time leaderboard updates using Supabase.
- Developed a shareable achievement showcase displaying student rank, overall score, total problems solved, and platform-wise performance.

CodeOrbit – DSA Learning Platform [Live Demo]

HTML5, CSS3, JavaScript, React.js, Three.js, WebGL, Responsive Design, Git/GitHub

- Developed a responsive DSA learning platform covering 19 structured topics with interactive navigation and immersive 3D visualizations using Three.js and WebGL.
- Implemented interactive 3D keyboard and topic exploration with hover-based previews, click-based navigation, and Dark/Light theme support.

Certifications

- Introduction to Data Science, Artificial Intelligence, and Natural Language Processing – Infosys Springboard
- Generative AI and ChatGPT – GeeksforGeeks
- Responsive Web Design – freeCodeCamp
- Java – CodeTantra

Achievements

- Solved 500+ coding problems across LeetCode, HackerRank, GeeksforGeeks, and CodeChef.
- Selected as Student Ambassador at Google Developer Student Clubs (GDSC).
- Participated in multiple national-level online and offline hackathons, collaborating in teams to design, develop, and present software solutions under time constraints.

Declaration
